ID = inside diameter
 PD = pitch diameter
 OD = outside diameter

1. Pitch diameters are used in calculation of RPM at fan shaft
2. Outside diameter is measured at the outside of the pulley and is used to identify which pulley is installed.
3. Bore ID: Note that motor shaft and fan shaft sizes differ so be sure to select the pulley with correct shaft hole diameter.

Notes:

FOR USE IN STANDARD CAPACITY SINGLE CIRCUIT COILS

FOR DUC VALVES PLEASE REFER TO THE UNIT PRICE PAGES OR NEWMAGIC4 SOFTWARE

R410A TXV's - Note connection style is either sweat or Chatleff threaded pattern for use with threaded "accurater" distributors.

For Changing older coils from R22 to R410A by just changing out TXV's the following rules apply:

If coil is used for Cooling only then changing out the TXV is acceptable for unit size 40 (10 ton) or smaller

If coil is used in heap pump application then changing out TXV is acceptable provided that;

a: Coil was manufactured after October of 2008

b: Unit is size 40 (10 ton) or smaller

Heat Pump Capability: TXV's with "C" Prefix have internal check valve and bypass and are heat pump compatible with no need for heat pump kit (HPK). All others require HPK for heat pump service. Refer to Accessories Price Sheet or NewMagic4 software.

Belt Drive Units sold prior to 2021 had either Lovato or GE Starters/Contactors/Overloads. Lovato parts are listed below.

The GE Starters and Contactors previously used are no longer available. They have been obsoleted by the manufacturer. Please follow the following steps for converting to the Lovato equivalent.

Regardless of which starter is currently installed in the unit, refer to the nameplate on the existing motor to confirm the voltage and amperage. The motor may have been replaced. Verify before replacing electrical components.

1) Does the field motor have automatic thermal overloads (ATC)?

If No, a starter and overload relay is needed.

If Yes, a relay or contactor can be used.

2) What is the motor horsepower?

3) What is the motor voltage (in use) and the Full Load Amps (FLA) rating?

Refer to **existing** motor nameplate to determine voltage and FLA. To the right is an example of a nameplate where the motor can be operated at three different voltages. The motor has 230/460 and FLA is 1.72/.861. This means if the motor is operating at 230, it will draw 1.72A. At 460V, it will draw .861A, and at 208V it will draw 1.9A. The nameplate has at the bottom an internal wire diagram that shows how it would be wired internally for a given voltage (one way for 208V and 230V, another way for 460V).

4) Select the contactor from the table below that is sufficient for the motor HP and voltage.

5) If an overload relay is needed, select one where the FLA is within the range of the

Examples:

3 HP, 115V, 32A, no ATC

Select 012-001585-000 contactor as it is the only one rated for 3 HP at 115V(120V).

Select 012-001588-000 overload relay as it is the only one rated to 32A

7.5HP,480V, 9.7 A, no ATC

To obtain replacement part numbers and pricing for these models please visit our RPL system on www.magicaire.com

From our homepage - select the box order status/Replacement Parts, then select the link "Replacement Parts" under the DP Products Replacement Parts. You will not need a log in to access the parts side.

From there enter either the unit serial number or full model number in the box shown

After entering on of those two items you will be able to get a specific parts list for that model.

The screenshot shows a web browser window with the URL magicstatus.magicaire.com. The page title is "Magic Aire WebLink Order Status System". The Magic Aire logo is in the top left. Contact information is listed: Telephone: (940) 397-2100 and Email: customer.service@magicaire.com.

There are two main sections:

- Customer Login:** Includes fields for "Account Number:" and "Password:" with a "Login" button.
- Find Replacement Parts:** Includes fields for "Unit Serial Number:" (with a note "(Preferred method)") and "Unit Codestring:", each with a "Go" button. A note below says "(Login not Required)".

An "INSTRUCTIONS" box is located at the bottom, containing the following text:

Account Number - This is your company's 5-digit bill-to customer number, which can be found on the sales order acknowledgment.

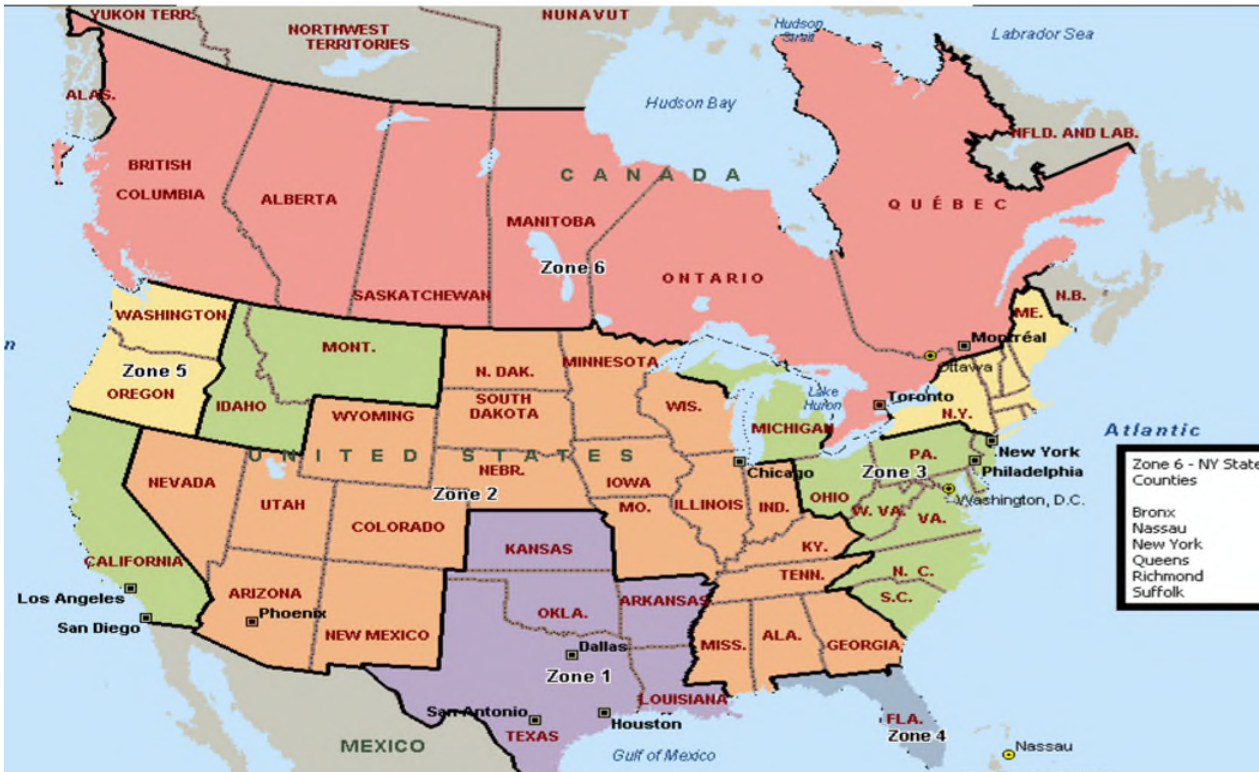

Password - If you have forgotten your password, please call Customer Service at (940) 397-2100.

Unit Serial Number - Without a logon, enter the 10-character serial number of the unit to get a list of replacement parts and the unit's ship date, codestring and ship-to location.

Unit Codestring - Without a logon, enter the codestring of the unit to get a list of replacement parts.
